Energising the oil and gas sector

Talk with a Logica expert 

Upstream. Downstream. The challenges are different but the rewards are the same if you can reduce the costs and improve the efficiency of your operations. Imagine if there was no reserve to increasing the productivity of your reserves. Or optimising your assets. Think of the advantage if you could increase downstream profitability and seamlessly deliver on all your major projects.

Working with you we'll share our expertise in Oil and Gas, gained worldwide. We'll deliver the solutions that make a difference. Like **real-time metrics upstream. And downstream.** So you'll have the right information to make the best decision, from **energy trading** to manufacturing. You can confidently **outsource marketing operations**, such as **fuel cards**, knowing we will save you time and money. And throughout we'll put the emphasis on **safety, managing risk**, and **being a good friend to the environment.**
